## Administrative history / Biographical sketch

---

The Initiative for Science in Europe (ISE) is an independent association of various research organisations and scientific groups that was founded on 25th October 2004. It was initiated to promote science in the formulation of European policy making. Its first efforts were coordinated by the European Life Sciences Forum (another organization EMBO played a crucial role in founding in 2000), but EMBO also joined as a founding member. Maria Leptin (EMBO Director 2010-2021) served as the ISE's president and Fiona Watt (EMBO Director 2021-) currently serves on the executive committee.

---

## Scope and content

---

Materials related to EMBO's role in the founding of ISE and the organisation of its activities.

---

## Notes

---

### Arrangement

These materials are arranged at the collection level.
