## Administrative history / Biographical sketch

---

The European Molecular Biology Organization (EMBO) was founded in 1964 by a group of leading European scientists to strengthen research in molecular biology and foster collaboration across Europe. Its establishment was closely linked to the creation of the European Molecular Biology Conference (EMBC, 1969), which provided intergovernmental support for EMBO's activities. EMBO promotes excellence in the life sciences through initiatives such as the election of distinguished researchers to its membership, the awarding of fellowships and grants, and the organization of scientific meetings, workshops, and training courses. In 1974, EMBO played a central role in establishing the European Molecular Biology Laboratory (EMBL), an intergovernmental research institution. Today, EMBO continues to support life scientists at all career stages and advocates for science policy across Europe and beyond.
